

## Planetarium Show Descriptions

### *For younger audiences:*

#### **No Place Like Space**

In this newly revised, bestselling children's book, budding astronomers are launched on a wild trip to visit the now eight planets in our solar system (per the International Astronomical Union's 2006 decision to downgrade Pluto from a planet to a dwarf planet), along with the Cat in the Hat, Thing One, Thing Two, Dick, and Sally. It's a reading adventure that's out of this world!

*Type of Show: Live FullDome story*

*Recommended for: Pre-K-Kinder*

#### **Perfect Little Planet**

Imagine the ultimate space vacation. Discover our solar system through a different set of eyes – a family from another star system seeking the perfect vacation spot. Fly over the surface of Pluto, our best known Dwarf Planet. Dive over the ice cliffs of Miranda. Sail through the rings of Saturn. Feel the lightning storms at Jupiter. And walk on the surface of Mars. Which destination would you choose? This is the solar system journey for space travelers of all ages.

*Type of Show: FullDome film followed by a live star talk*

*Recommended for: PreK-3<sup>rd</sup>*

#### **Max Goes To The Moon**

Max the Dog and a young girl named Tori take the first trip to the Moon since the Apollo era, and their trip proves so inspiring to people back on Earth that all the nations of the world come together to build a great Moon colony. Along the way, the story sets the stage for the more sophisticated science, all thoughtfully explained so that grownups and children can learn together about science.

*Type of Show: FullDome film followed by a live moon talk*

*Recommended for: 2<sup>nd</sup>-4<sup>th</sup> grade*

#### **Daytime, Nighttime**

Learn some of the basics of astronomy and how our sky changes over time, with the seasons, moon phases, and more. An interactive experience where the operator asks the audience to make observations just like real scientists!

*Type of Show: Live FullDome presentation*

*Recommended for: Pre-K-2<sup>nd</sup> grade*

### *For all audiences:*

#### **Legends of the Night Sky**

Take a lighthearted and imaginative look at the myths and stories associated with the constellation Orion or the constellations of Perseus and Andromeda.

*Type of Show: Laser animation followed by a live star talk*

*Recommended for: Pre-K and up*

### **Season of Light**

An updated “fulldome” version of a holiday classic, this show traces the history and development of many of the world's most endearing holiday customs, all of which involve lighting up the winter season — from the burning Yule log to the lighting of luminarias in the American Southwest. Audiences will learn a selection of Northern hemisphere winter constellations, and find out why we have the seasons. Season of Light is visually rich, culturally inclusive, musically satisfying, and soothing as a warm drink on a cold winter's night!

*Type of Show: FullDome film followed by a live star talk*

*Recommended for: Pre-K and up*

### **Dynamic Earth**

The award-winning Dynamic Earth explores the inner workings of Earth's climate system. Audiences will ride along on swirling ocean and wind currents, dive into the heart of a monster hurricane, come face-to-face with sharks and gigantic whales, and fly into roiling volcanoes. Narrated by Liam Neeson.

*Type of Show: FullDome film followed by a live Earth talk*

*(Film portion of show is also available in Spanish; the star talk would still be in English. We need to know a few days before your visit if you would like the Spanish version)*

*Recommended for: 3<sup>rd</sup> grade and up*

### **From Earth to the Universe**

The night sky, both beautiful and mysterious, has been the subject of campfire stories, ancient myths and awe for as long as there have been people. A desire to comprehend the Universe may well be humanity's oldest shared intellectual experience. Yet only recently have we truly begun to grasp our place in the vast cosmos. To learn about this journey of celestial discovery, from the theories of the ancient Greek astronomers to today's grandest telescopes, we invite you to experience *From Earth to the Universe*.

*Type of Show: FullDome film followed by a live star talk*

*Recommended for: 3<sup>rd</sup> grade and up*

### **Sunstruck**

Discover the wonders of our sun. Its incredible energy has supported life on earth for millennia but is now threatening our technology and way of life. Travel to the distant future to discover our sun's connection to the universe's cosmic cycle of life and death.

*Type of Show: FullDome film followed by a live star talk*

*Recommended for: 3<sup>rd</sup> grade and up*

### **We Are Stars**

We follow a group of Victorian time travelers as they learn about the origins of atoms. We witness the formation of the first hydrogen atoms after the Big Bang and then watch how those hydrogen atoms gather into galaxies and stars. We learn how the stars forged all the atoms needed to make life. We see the creation of planet Earth and follow the atoms and molecules through evolution, back to where the time travelers started their journey.

*Type of Show: FullDome film followed by a live star talk*

*Recommended for: 3<sup>rd</sup> grade and up*

### **BUGS! A Rainforest Adventure**

Get a view of the fascinating universe of insects magnified up to 250,000 times their normal size in BUGS! A Rainforest Adventure. Become immersed in a miniature world, where a leaf weighs as much as a car and a single raindrop can quench the largest thirst. Highlighting the extraordinary world of insects, BUGS! A Rainforest Adventure focuses on the life cycles of a praying mantis and a butterfly from their birth to their inevitable encounter in the tropical rainforests of Southeast Asia, where predator meets prey.

*Type of Show: FullDome nature film*

*Recommended for: 3<sup>rd</sup> grade and up*

### **Back to the Moon for Good**

Immerse yourself in a race to return to the Moon forty years after the historic Apollo landings. See how competition among privately funded international teams is ushering in a new era of lunar exploration. Learn about the Moon's resources and discover what humanity's future on the Moon might hold. Narrated by Tim Allen, *Back To The Moon For Good* presents the Google Lunar XPRIZE, and the personal stories of competition and collaboration it inspires.

*Type of Show: FullDome film followed by a live star talk*

*Recommended for: 4<sup>th</sup> grade and up*

### **Exploring New Horizons**

This show tells the full story of the New Horizons mission and Pluto. From the discovery of Pluto in 1930, to the science of the icy objects that form the Kuiper Belt, to the launch of the New Horizons mission in 2006, this new show is the perfect introduction to the discoveries that will unfold once New Horizons reaches Pluto.

*Type of Show: FullDome film followed by a live star talk*

*Recommended for: 4<sup>th</sup> grade and up*

### **Tucson Sky and Beyond**

This is our "classic" night sky show, but not like you remember it! Take a relaxing look at the night sky as one of our skilled "Console Captains" gives you a guided tour of the stars, planets, constellations and current events happening in the night sky. This live show is never the same and there is always a surprise in store

*Type of Show: Live FullDome Presentation*

*Recommended for: 5<sup>th</sup> grade and up, show can be tailored to your grade level*

### **Touring the Solar System**

Zoom away from planet Earth and take a guided tour through the Solar System! In this show we stop by each of the planets and learn why they are unique. We'll even explore moons, asteroids, the Milky Way and beyond. Hold on, this is one fun ride.

*Type of Show: Live FullDome Presentation*

*Recommended for: 5<sup>th</sup> grade and up, show can be tailored to your grade level*

### **Forward to the Moon**

NASA's 21st century [Artemis program](#), named after the Greek moon Goddess and twin of Apollo, is the next step in our mission to explore the universe and land the first woman and person of color on the surface of the Moon. Narrated by Mythbuster's Kari Byron.

*Type of Show: FullDome Show followed by a live Moon talk*

*Recommended for: 5<sup>th</sup> grade and up*

### **Desert Moon**

Documentary of the University of Arizona's contribution to the Apollo missions, the space race and the mapping of the Moon. Narrated by Mark Kelly

*Type of Show: Front screen film followed by a live Moon talk*

*Recommended for: 6<sup>th</sup> grade and up*

### **Fractal Explorations**

This show examines what fractals are, how they are made (algebraically and geometrically), and where they are found in nature. Filled with engaging graphics, is a feast for the eyes, as well as an exercise for the mind.

*Type of Show: FullDome Show followed by a live star talk*

*Recommended for: 6<sup>th</sup> grade and up*

### **IBEX**

Join scientists who are investigating the boundary between our Solar System and the rest of our galaxy in IBEX: *Search for the Edge of the Solar System*. Designed for visitors with an appreciation for the challenges of space science and a desire to learn more about science research, the show follows the creation of NASA's Interstellar Boundary Explorer (IBEX). Audiences will get an in-depth look at the mission and how IBEX is collecting high-speed atoms to create a map of our Solar System's boundary. Narrated by two inquisitive teenagers, audiences will hear from the scientists and engineers that developed the IBEX mission and created the spacecraft and get the latest updates on the mission's discoveries.

*Type of Show: FullDome film followed by a live star talk*

*Recommended for: 6<sup>th</sup> grade and up*

### **Phantom of the Universe**

Phantom of the Universe showcases the exciting exploration of dark matter, from the Big Bang to its anticipated discovery at the Large Hadron Collider. The show reveals the first hints of its existence through the eyes of Fritz Zwicky, the scientist who coined the term "dark matter." It describes the astral choreography witnessed by Vera Rubin in the Andromeda galaxy and then plunges deep underground to see the most sensitive dark matter detector on Earth, housed in a former gold mine. From there, it journeys across space and time to the Large Hadron Collider at CERN, speeding alongside particles before they collide in visually stunning explosions of light and sound, while learning how scientists around the world are collaborating to track down the constituents of dark matter.

*Type of Show: FullDome film followed by a live star talk or dark matter talk*

*Recommended for: 9<sup>th</sup> grade and up*

### **Journey to Mars**

Learn about the history of Mars exploration and what it would take to send humans to the red planet.

*Type of Show: Live FullDome presentation including a short video clip from NASA*

*Recommended for: 5<sup>th</sup> grade and up*

### **5000 Eyes**

The Dark Energy Spectroscopic Instrument (DESI) is creating the most detailed map of our nearby universe. Installed on the Mayall telescope on Kitt Peak in Southern Arizona, DESI's 5000 independently operated robots can measure the light from thousands of galaxies at once. Join us as we explore the science, instrument, and people behind this global endeavor.

*Type of Show: FullDome film followed by a live star talk*  
*Recommended for: 9<sup>th</sup> grade and up*

### **Expedition Reef**

Learn the secrets of the “rainforests of the sea” as you embark on an oceanic safari of the world’s most vibrant—and endangered—marine ecosystems. Narrated by Tony Award® winner Lea Salonga, the all-digital Expedition Reef immerses you in the undersea adventure. Along the way, discover how corals grow, feed, reproduce, and support over 25% of all marine life on Earth—while facing unprecedented threats from climate change, habitat destruction, and overfishing.

*Type of Show: FullDome film followed by a live ocean talk*  
*Recommended for: 3<sup>rd</sup> grade and up*

### **Big Astronomy**

Journey to three world-class observatories in Chile’s rugged Andes Mountains and arid Atacama Desert— remote, extreme regions that happen to have the perfect conditions for astronomical research. Along the way, you’ll meet an inspiring cast of astronomers, engineers, technicians, and support staff who keep these mega-machines running.

*Type of Show: FullDome film followed by a live star talk*  
*Recommended for: 9<sup>th</sup> grade and up*

### **Climate Change in Our Backyard**

Explore the role of carbon dioxide in our atmosphere, the natural temperature variations the Earth has experienced over millions of years, and how we are affecting our planet today. Discover how scientists are researching the changing climate and what strategies people from all across the world are taking to protect our future.

*Type of Show: FullDome film followed by a live Earth talk*  
*Recommended for: 9<sup>th</sup> grade and up*

### **The Sun, Our Living Star**

Discover the secrets of our star and experience never-before-seen images of the Sun’s violent surface. This visually striking planetarium show is about the most important star in our lives.

*Type of Show: FullDome film followed by a live Sun talk*  
*Recommended for: 5<sup>th</sup> grade and up*

### **One Sky**

This film represents the perspective of six different cultures or Indigenous societies from around the globe. Each short story is combined into a longer narrative organized around themes of "Finding Patterns" and developing tools, or as we say, "To Seek Far."

*Type of Show: FullDome film followed by a live star talk*  
*Recommended for: 5<sup>th</sup> grade and up*

## Laser Light Music Shows

### *GENERAL ENTERTAINMENT SHOWS*

LASEROPOLIS: [Track Listing](#)  
LASER MAGIC: [Track Listing](#)  
LASER X: [Track Listing](#)  
LASER HOLIDAYS: [Track Listing](#)  
LASER BEATLES: [Track Listing](#)
